

# JEFF BROADBENT

## AUDIO CORPORATION

OFFICIAL WEBSITE: [www.jeffbroadbent.com](http://www.jeffbroadbent.com)

Jeff Broadbent is a **Hollywood Music In Media Award**-winning and **Global Music Award**-winning composer whose passion for music and sound has been heard around the world in numerous video games, television programs, trailers, and films.

Broadbent has composed music for some of the leading video game companies in the world including **Activision, Warner Bros., Sony Online, Electronic Arts, Ubisoft, and NetEase**. His unique and authoritative musical style combines the power and depth of the orchestra with cutting-edge synthesizers and sound design elements, making him a very unique, adaptable and versatile composer. Such musical diversity is evident in

Sony Online's PLANETSIDE 2 in which Broadbent fused elements of orchestra, rock, and electronic genres, winning him a Hollywood Music In Media Award for Best Video Game Score and a Global Music Award of Merit. Jeff's ambient sound-design inspired score for Ubisoft's I AM ALIVE resulted in rave press reviews, an Outstanding Production Winner Award (Square Enix Music Online), and an additional Hollywood Music In Media Award nomination. Broadbent's adrenaline-fueled action music has been heard in blockbuster film video games such as TRANSFORMERS: DARK OF THE MOON (Soundtrack Geek Awards - Best Video Game Score Nomination), EXPENDABLES 2, and TEENAGE MUTANT NINJA TURTLES.

"The power of music to instill a wide variety of emotions is unrivaled. It is a very visceral art, one that has the ability to speak to us on many levels. I have a great passion for music, and believe that it plays an integral part in human existence. My dream is to share this passion with others."

In addition to Broadbent's work for video games, his music has been featured on prime-time television for networks including CBS, MSNBC, FOX, the Discovery Channel, VH1, and more. In 2010 Jeff composed the score for the feature film THE GRAY AREA (winner of the Platinum Narrative Feature Award). In addition to his work for film, television, and video games, Broadbent has composed production and trailer music for some of the world's leading music houses including WARNER CHAPPELL, UNIVERSAL, POSITION MUSIC, and more.

## PRESS QUOTES

"The music is fantastic, masterfully composed..."

★ *Dawngate forum (Dawngate)*

"This OST is completely amazing... love it"

★ *Dawngate YouTube Channel (Dawngate)*

"PlanetSide 2 is expertly scored by Jeff Broadbent... Each faction receives its own flair in the music department... Sound Score: 95/100 - Outstanding"

★ *Ten Ton Hammer (PlanetSide 2)*

"Planetside 2 has some amazingly diverse backing music. With upbeat adventure music found in allied zones, to dark and ominous battle music that will have the player feeling like the outpost they're defending is Helm's Deep. Audio score: 9.5/10 -

Great soundtrack that set the stage for war." ★ *Gaming Illustrated (PlanetSide 2)*

"Tremendously haunting and poignant... Superb atmosphere and musical score..."

★ *Computer and Video Games (I Am Alive)*

"Audio is key to the tension, and being scored by Jeff Broadbent who displays a complete mastery of chilling sounds and emotive melodies means that you're on edge throughout most of the game. It's expertly crafted and one of the better uses of audio in video games simply because it's tied to a key component of the gameplay." ★ *MSXboxWorld (I Am Alive)*

"The soundtrack features a striking main theme that emphasizes the hybridized nature of the Transformers franchise... The action themes of Transformers: Dark of the Moon are rich and energetic like their film counterparts. Tracks such as "Autobots the Protectors" capture the heroic Autobots with their grand and hopeful sounds... In contrast, the destructive Decepticons are portrayed with loud and brutal cues including "Shockwave Battle", while the melancholic vocals of "Dreadwind Assault" are particularly effective in capturing the human aspect of the robot conflict." ★ *Square Enix Music Online (Transformers: Dark of the Moon Game)*

"Dark of the Moon delivers an exceptional sound package... The music was incredible and fit the action of the gameplay and emotion of the cut scenes." ★ *Game Chronicles (Transformers: Dark of the Moon Game)*
