

League of Legends: Wild Rift Superhero Jayce Trailer

Developer/Publisher: Riot Games
Music composed by: Jeff Broadbent

League of Legends Wild Rift is a multi-player online battle arena game, based on the popular League of Legends video game. Jeff Broadbent composed music for a new trailer featuring Jayce, one of the main characters of Wild Rift, showcasing his superhero story, upgrades, and powers.

Jeff comments: "I've always loved super-hero stories. These narratives and characters represent the ideals of humankind, and the epic struggle between good and evil."
"While composing the music for this trailer, I wanted to create an immediate and bold motif, to serve as the melodic theme and representation of Jayce and his newfound skills. The main melody is played by powerful French horns and soaring strings, and is accompanied with rhythmic string orchestra, massive percussion, as well as modern electronic effects, pulses, and electric guitar supporting elements. "

"The music is bold, optimistic, and confident, as Jayce prepares to test his new skills, defend mankind, and bring justice to its oppressors."
